Summary

Highly motivated and dedicated student with a passion for Competitive Coding, Data Analysis, and Data Visualization. Pursuing B.Tech in CSE-Data Science with a strong foundation in Python, SQL, and data tools. Experience in building real-world projects using Python libraries and API integrations. Interested in joining a reputable company to leverage skills and drive its success.

Education

Aditya College of Engineering and Technology — Andhra Pradesh, India
B.Tech in Computer Science – Data Science, CGPA: 7.1 — *2023 – 2027*

Royal Junior College — Telangana, India
Intermediate (MPC) – 76% — *2021 – 2023*

Technical Skills

Programming Languages: Python, Java, C, JavaScript, HTML, CSS (Familiar), React, React Native
Libraries: NumPy, Pandas, Matplotlib, Seaborn
Database: SQL, DBMS
Tools: VS Code, Excel, Power BI
Proficiencies: Data Structures and Algorithms, Object Oriented Programming, DBMS
Soft Skills: Public Speaking, Event Organization, Leadership

Experience

Intern – Data Analysis using Python — May 2025 – July 2025
APSSDC — *Andhra Pradesh, India*

- Completed an internship on Data Analysis using Python, gaining hands-on experience with industry-standard data tools.
- Learned and applied different Python libraries including NumPy, Pandas, Matplotlib, and Seaborn for data exploration and visualization.

Projects

Business Sales Analytics Dashboard | *Power BI, Excel* — GitHub

- Designed and developed an interactive Business Sales Analysis Dashboard in Power BI to visualize KPIs such as total sales, monthly sales trends, regional performance, and highest profits.
- Imported and transformed raw sales data from Excel, created calculated measures with DAX to enable dynamic filtering and drill-down analysis for business decision-making.

Placement Prediction Model | *Python, Numpy, Pandas, Matplotlib* — GitHub

- Built a Data Analytics model in Python to predict student placement chances using historical data and data analysis techniques.
- Analyzed and cleaned student data to improve prediction accuracy and generate meaningful insights for placement outcomes.

Currency Converter | *Python, API Integration* — GitHub

- Developed a user-friendly currency converter that accurately converts amounts using live exchange rates fetched via API integration.
- Built a clean and intuitive interface ensuring quick conversions without manual errors, demonstrating skills in building practical applications with excellent user experience.

Certifications

- Python Certificate
- Data Analytics-Intern
- NumPy & Pandas for Data Analysis
- Getting Started with Artificial Intelligence
- SQL Certificate
